Kern AG wins two major orders

Konolfingen, 29 August 2017 - **Kern AG in Konolfingen (Bern), the high-performance inserting systems specialist, has received two orders worth several million Swiss francs from France and the USA. This is an indication of satisfying growth in order intake and order volume.**

Kern AG is known for precision and innovation. In France, a state authority has decided on our inserting systems following a call to tender. In the USA, the order is for replacement of existing systems at a large bank. Kern AG has its own sales and service organisations in both countries, which provide technical support for the high-precision inserting systems. It should also be mentioned that Kern AG was able to provide a range of systems able to meet both current and future customer requirements.

Marketing & Sales Director, Stephan Zaugg: "Our flagship in particular, the high-performance Kern 3600 inserting system, is the foundation responsible for the sales success. This success should be considered particularly great, as we are a Swiss company competing on an international stage. All products are fully developed and produced in Switzerland, and these sales therefore also represent a commitment to Swiss industry."

Kern AG – innovative systems for document processing and packaging

Kern AG, with its Swiss headquarter (in Konolfingen, Bern), is a leading global manufacturer of products, solutions, and services in the fields of insertion technology, digital printer post-processing technology, card processing solutions, and smart terminals. Since its 1947 foundation by Marc Kern, the company has remained a family-run business, and is today managed by its second-generation owner, Uli Kern. Customers include print service providers, banks, authorities, postal services, telephone companies, energy suppliers, data centres, and insurance providers. Kern Service is available around the clock, 7 days a week. The Group is active in around 70 countries, and employs approximately 900 employees.
