

FloorMonitor

Kern Software Solution

kern**Software**

mailFactory® FloorMonitor illustrates the actual situation in your mailroom. The status of all production systems and other key performance indicators (KPIs) are displayed.

mailFactory® FloorMonitor as a service within mailFactory® ManagerSphaera shows the actual information about systems and running jobs in the mail room.

This information provides a quick overview of how the production lines are operating. Together with mailFactory® ReprintControl job lists display upcoming jobs and inform additionally about their importance and SLA timelines.

Features

System Information

- Visualized information for every production system status like: Running, Stopped, Error, Maintenance, etc.

Job Progress Information

- Visualized information about running production jobs like: Type and size of the job, production progress, remaining production time, etc.

Job Status Information

- Visualized information about job status like: Job is On-Time, On-Risk or Delayed.

Our Services

- We help to analyze the mail production process and offer consulting to integrate the mailFactory® FloorMonitor optimally in your mailroom environment
- Project management services over the entire integration
- Customizable software components and solutions
- On-site training for your employees

Upcoming Job Information

- Visualized information about upcoming jobs together with mailFactory® ReprintControl.
